CONSTANT VELOCITY JOINTS for AUTOMOBILES

汽车用等速万向节

CAT. No. 5601-Ⅲ/CE

NTN constant velocity joint for automobiles supports the concept of "Fun to Drive"

NTN constant velocity joints are used in automotive propeller shafts and half shafts to transmit power from the engine to the wheels.

In today's automotive market there are increasing demands to create safer, more comfortable, environment-friendly vehicles.

In response to these needs, NTN constant velocity joints have always provided long life, outstanding function, low weight and compactness.

As a pioneer in the field of constant velocity joints, NTN has gained abundant experience over the years and this experience has been used for innovations and continuous improvements of our products.
